The information contained herein may not be copied, retransmitted, disseminated, distributed, sold, resold, leased, rented, licensed, sublicensed, altered, modified, adapted, or stored for subsequent use for any such purpose, in whole or in part, in any form or manner or by any means whatsoever, to or for any person or entity, including the purchaser, without DotEx International Ltd. express prior written consent.

1. Introduction to NOW

- NOW investor terminal is a browser based trading interface. It allows investor client to trade online by logging in to www.nowonline.in.
- It provides safe, secure and reliable trading platform.
- It aims at maximizing trading convenience and real time access to market data.

2. Login

- Member ID, user ID and login password is required for successful login to www.nowonline.in.
- Password change for both login and transaction password is mandatory on first time login.
- As a safety feature NOW provides multi level security check.
 - **Login password** for login to the website.
 - **Transaction Password** for authenticating order entry transactions.
- After successful login, the user information such as broker ID, broker name, SEBI registration numbers for all enabled segments viz. NSE, NFO, NCDEX & CDS account ID is displayed on Home Page.

- After login to NOW, if NOW website remains idle or no activity is performed for 15 minutes, then investor client gets automatically logged out and is required to re-login to NOW by entering correct member ID, user ID and password.

3. Change Password

- An Investor client can change login and transaction password from 'Account – Change password'.
- The login and transaction password can't be kept same at the time of changing the password.
- The password should be in a combination of alphabet and number.
- Login and transaction passwords expire every 14 days.
- On password expiry, the system prompts for change in password. The investor client can login only after changing the password.
- The previously used three passwords can't be used as new password.

Change Password

User Name	<input type="text" value="MANU-NSE"/>
Old Password	<input type="password"/>
New Password	<input type="password"/>
Confirm Password	<input type="password"/>
Old Transaction Password	<input type="password"/>
New Transaction Password	<input type="password"/>
Confirm Transaction Password	<input type="password"/>

4. Get Log Messages

- The log message is viewed under 'Account – Get Log Messages' menu.
- It displays the messages of all orders and trades placed during the trading day.
- Search specific information in Log Messages window, by keying the text in search field.
- The log messages is viewed / saved in a Word file

5. User Profile

- The detail of the Investor client is viewed under 'Account – User Profile' menu.
- Below mentioned information is displayed under 'User Profile':
 - Account details
 - Personal details
 - Contact details
 - Bank details
 - DP details

Account Profile - Microsoft Internet Explorer

6. Express / Streamer

- Express or steamer module enables investor client to get real time market data.
- Salient features of express or steamer are as follows:
 - Real-time market information or streaming quote.
 - Easy accessibility i.e. short keys are available for invoking various window similar to NOW.exe which are as follow:

Functions	Shortcut keys
Buy order entry	F1 or +
Sell order entry	F2 or -
After Market Buy Order	Ctrl + F1
After Market Sell Order	Ctrl + F2
Order Book	F3
Trade Book	F8
Add Security or contract	F4
Delete Security or contract	Delete
Intraday Graph	F10
Position	F12
Holding	F9
RMS Limit	F11
RMS Sub Limit	Ctrl + R
Spread Order Report	Ctrl + S

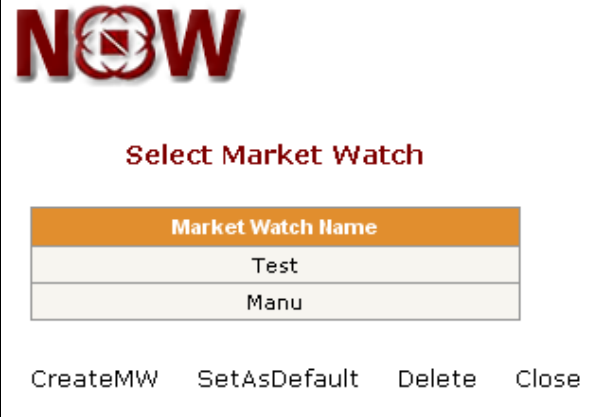

- Set multiple market watch and configure settings of market watch.
- Sort each column of various windows such as market watch, order book, trade book, in ascending & descending order.

Note: For efficient usage of this feature, client is required to have good internet bandwidth connection.

12. Intra Day Charts

- Intraday chart for selected security or contract is invoked from 'Trade – Market Watch – Intraday'
- Intraday chart displays the price movement of selected security or contract during trading hours.
- The chart displays 3 inter-related graphs:
 - Last Traded price
 - Scrip Volume
 - Cumulative Traded Volume

13. Buy / Sell Order Entry

- Order entry with **NOW** is fast, convenient and secured.
- Place buy/sell order by selecting the security or contract from the market watch and enter the following fields:
 - **Product Code:** Select the type of product to be assigned as;
 - Cash & carry (CNC)
 - Margin intraday square-off (MIS)
 - Normal (NRML)
 - Buy/Sell
 - Price Type
 - Limit price (LIMIT)
 - Market Price (MARKET)
 - Stop-Loss Limit (SL-L)
 - Stop-Loss Market (SL-M)
 - Retention
 - Day (Valid Till Day)
 - IOC (Immediate or Cancel)
 - Qty: Enter buy or sell quantity of security or contract in the field.
 - Disc Qty: It is an optional field. Out of the total quantity ordered, enter the quantity that is desired to be disclosed. If disclosed, it has to be minimum 10% of the total quantity entered.
 - Price: Enter buy or sell price for security or contract in the field.
 - Click on 'Submit' button to execute the order.
- Place buy / sell order without selecting security or contract from market watch or if the security or contract is not added to the market watch, as follows:
 - Exchange: Select the exchange from dropdown NSE for cash segment, NFO for futures & option segment, CDS for Currency derivative segment, NCDEX, ICEX, NMCE for commodities segment.
 - Series/Settlement Type: Select the series or settlement type such as EQ, FUTIDX, FUTSTK, OPTIDX, OPTSTK, FUTCOM respectively.
 - Search text: Search for company name by entering minimum first 3 alphabets of desired company.
 - Company Name: Select the company name from drop down option.
 - Scrip Symbol: Select the scrip symbol from drop down option. On selecting scrip symbol company name is picked up automatically
- Follow the same process as carried out for buy / sell selected security from market watch.

21. Ticker

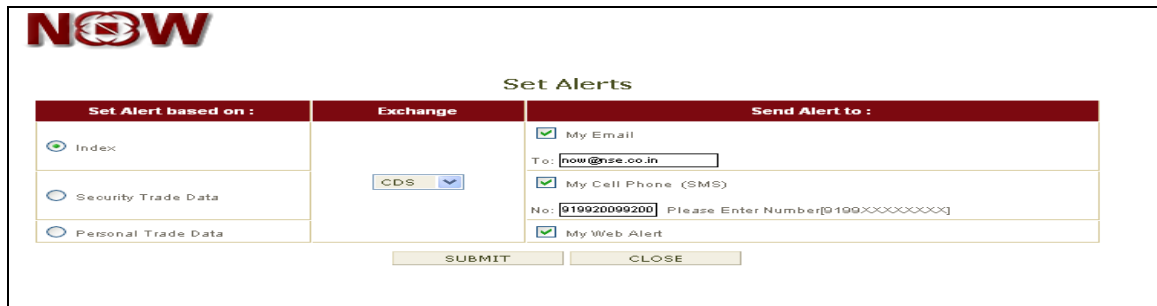

- The ticker window displays the prices of security or contract on a real time basis. Customize the ticker to display only the securities or contract of interest.
- Once log in, the default ticker start displaying the latest information of the security or contract at the bottom of the page.
- NOW allow to select one of the portfolios or market watch to be the default ticker.
- It also allows detaching the ticker. Thus enabling to keep track of security or contract while carrying out any other task/activity.

22. Alerts

With so much happening in the market in such a short time it is sometimes very difficult to keep track of all security or contract or events in the market. So to keep informed about all the important events in stocks, an alerts function is provided in NOW. This feature enables to configure different alerts and triggers based on satisfying various parameters. NOW keeps track of all parameters and intimate as and when the alert is triggered. Specify where and how to receive the alerts. Following are the configurable alerts and triggers:

- **Index based Alerts:** Set alert conditional to index values.
- **Security based Alerts:** Set alert conditional to following security or contract values;
 - Last trade price
 - % Change in last trade price
 - Total traded volume for the day
 - Total traded value for the day
 - Security volume weighted average price
- Security alert is based on specific exchanges
- Set the mode of communication of alert through:
 - E-mail
 - SMS
 - Pop-up
